ABOUT US :

Agrospace Steading Pvt Ltd is a forward-thinking food processing company committed to delivering high-quality frozen produce with a focus on hygiene, consistency, and natural preservation. We are driven by the belief that everyone deserves access to safe, nutritious food—regardless of season or location.

Our facility is equipped with modern infrastructure including :

- Urschel slicing and dicing systems for precision processing
- IQF (Individual Quick Freezing) technology that preserves freshness, texture, and nutrients
- Ultra-low temperature cold storage ensuring extended shelf life without additives
- Fully FSSAI-compliant production practices focused on food safety and traceability

What makes us stand out is our farm-integrated model that ensures timely procurement, minimal handling, and rapid freezing of fresh produce. This streamlined approach allows us to reduce waste, maintain quality, and support the farming ecosystem at its roots.

We are committed to building a sustainable, transparent, and quality-first food supply chain-offering products that meet the evolving needs of modern consumers, institutional buyers, and international markets.

OUR VISION :

To lead the transformation of India's frozen food industry by offering naturally preserved, hygienically processed, and globally trusted products that contribute to healthier lifestyles and sustainable food systems.

OUR AIM

- To preserve the natural goodness of fruits and vegetables through advanced IQF technology
- To deliver consistent, high-quality products free from preservatives or additives
- To build long-term partnerships with farmers through ethical sourcing and fair practices
- To adopt efficient, eco-conscious processes that reduce food waste and energy consumption
- To serve domestic and international markets with reliability, transparency, and integrity

OUR PROCESS :

At Agrospace Steading Pvt Ltd, we follow a meticulously controlled process to ensure that every pack of frozen food delivers farm-fresh quality, year-round. Our approach is built on precision, hygiene, and speed — preserving nature's best without compromise.

1. Direct Farm Procurement

We work closely with local farmers across Madhya Pradesh, sourcing fruits and vegetables at the peak of ripeness for maximum flavour and nutrition.

2. Sorting & Cleaning

Raw produce is brought to our facility and undergoes multi-stage cleaning, destoning, and grading using automated equipment to remove impurities and ensure uniformity.

3. Precision Cutting with Urschel Machines

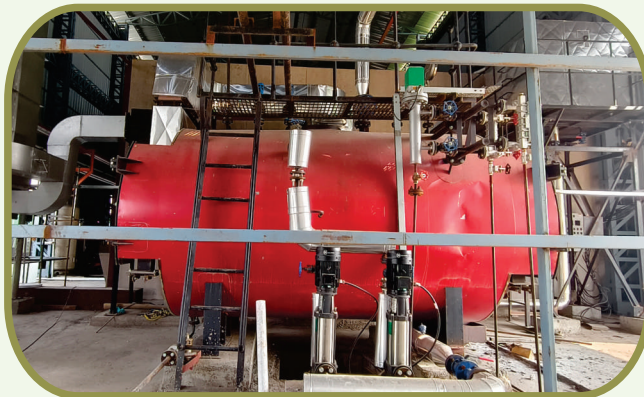

Using globally trusted Urschel slicers and dicers, we achieve consistent shapes and sizes suited for both retail and bulk requirements.

4. Individual Quick Freezing (IQF)

Our core technology — IQF — rapidly freezes each piece individually at temperatures below -18°C, locking in natural color, taste, and nutritional value without the need for preservatives.

5. Packing & Cold Storage

The frozen produce is packed in hygienic, food-grade packaging and stored in our modern cold storage until dispatch. Each batch is traceable and quality-checked to meet FSSAI standards.

WHY CHOOSE US :

At Agrospace Steading Pvt Ltd, quality is not a feature—it's our foundation. From the first harvest to the final pack, every step is carefully designed to ensure purity, consistency, and satisfaction.

1. Farm-Integrated Sourcing

We partner directly with farmers in Madhya Pradesh, building long-term relationships that support rural livelihoods and ensure the freshest produce reaches our facility.

2. Hygienic Infrastructure

Our plant is built to meet global food safety standards with stainless steel lines, positive air pressure zones, and dedicated hygiene protocols at every stage.

3. Global-Grade Technology

With Urschel cutting systems and advanced IQF lines, we match international benchmarks in shape retention, freezing speed, and microbial control.

4. Scalable Operations

Whether it's a 1kg retail pack or bulk orders for institutional buyers, we have the capacity to fulfill demand while maintaining quality.

5. Clean Label Commitment

No artificial preservatives. No added colors. Only pure, frozen fruits and vegetables the way nature intended.

6. Centrally Located

Our facility in Madhya Pradesh offers fast access to pan-India logistics routes, reducing turnaround time and ensuring fresher delivery.

IQF VEGETABLES FROM MADHYA PRADESH

These are commonly cultivated and can be processed using IQF (cut, blanched, or whole):

- Green Peas
- Sweet Corn
- French Beans
- Carrot (Red & Orange)
- Cauliflower Florets
- Okra (Bhindi)
- Spinach (Palak)
- Chili (Green, Red – for cut/whole use)
- Pumpkin (Kaddu)
- Beetroot
- Tomato (for cubes, slices)
- Garlic
- Ginger
- Turmeric
- Brinjal (Eggplant – less common in IQF)

IQF FRUITS FROM MADHYA PRADESH

These fruits can be cut/sliced/diced and frozen with IQF methods:

- Mango (Totapuri & Langra varieties mostly)
- Papaya (Red Lady, Coorg Honeydew)
- Guava (White & Pink)
- Banana (Raw & Ripe)
- Pineapple (grown in parts of MP in recent years under controlled farming)
- Amla (Indian Gooseberry)
- Custard Apple (Sitafal)
- Ber (Indian Jujube) (niche, but possible for IQF slices)
- Jamun (good for pulp or deseeded freezing)

PULP-SUITABLE FRUITS FROM MP

These are typically pulped (not IQF whole) and used in beverages, ice creams, or desserts:

- Alphonso Mango (imported from Maharashtra, but pulp made in MP)
- Totapuri Mango (grown in parts of MP)
- Guava (White/Pink)
- Papaya
- Custard Apple (Sitafal)
- Amla
- Jamun
- Bael (seasonal, niche)

Green Peas

Sweet Corn

French Beans

Cauliflower Florets

**Okra
(Bhindi)**

**Spinach
(Palak)**

**Pumpkin
(Kaddu)**

Beetroot

**Tomato
(for Cubes, Slices)**

Turmeric

Ginger

Brinjal

(Eggplant - less common in IQF)

**Carrot
(Red & Orange)**

Chili

(Green, Red - for cut/whole use)

Garlic
